

Tumps change register

v15.1 of the DoBIH (December 2015) to v15.2 (April 2016)

Note: this change register should include all Tumps. However, it is only concerned with data relevant to each hill's listing as a Tump, so, for example, changes in height leading to a Dewey becoming a Hewitt, or changes in drop leading to a Submarilyn becoming a Marilyn, are not covered here.

New Tumps

*bing (artificial hill)

Note: The Tump hills 19190 Cleabarrow Hill and 19191 Saskills were separated off from the entries of, respectively, the Wainwright Outlying Fells 3333 nameless (School Knott) and 2691 Newton Fell North. Previously the Tumps and Wainwright Outlying Fells had shared the same hill number despite being at slightly different locations. Those who have climbed the hills will need to add new records for hills 19190 and 19191 (assuming, of course, that they have been to the highest points of the hills).

Significant name changes

Not every name change is included here; there were typos that have been corrected, or instances where the Gaelic was subtly wrong. In such cases the sense of the name is still clear.
