### Relocations and Replacements

This includes relocations of just a hundred metres up to distances of over a mile. In each case the new entry replaces the hillnumber of the old, so users of both the P30 Appendix and hill-bagging.co.uk are encouraged to check that their logs are still valid. If the old location was included under a different name, this is indicated in the rightmost column.

### 'Relocations' due to typos in grid reference

It was necessary to include these because I know how hard it is to find the hill when you don't know which bit of the grid reference is faulty!

### Significant name changes

Not every name change is included here; there were many typos that have been corrected, or instances where the Gaelic was subtly wrong. In such cases the sense of the name is still clear.

## Removed to DoBIH

These are the only hills that have changed their hillnumber. Users of the database will need to transfer their logs over. The process should be automatic on the website.

Most of the hills included here are due to the incorporation of the Lake District list of Synge's into v13.3 of the DoBIH.
